

Your personal safety and support assistant

 PhoneCam™

PhoneCam is a compact, wearable bodycam that easily connects to your smartphone. When paired with the PhoneCam app, it offers safety & support. With the press of a button, users can instantly share or record live video, audio, and GPS location with the central control room and to teammates phone. PhoneCam provides a valuable solution for anyone who needs extra support at work, at home, or on the go.

Key features

- ✓ Compact & wearable
- ✓ Live video, two-way audio & GPS location
- ✓ One button-press activation
- ✓ Recordings and central control room
- ✓ Enables AI applications
- ✓ More affordable than existing solutions

Simple to use

Activate PhoneCam with a single press and instantly connect to live support.

Quick to set up

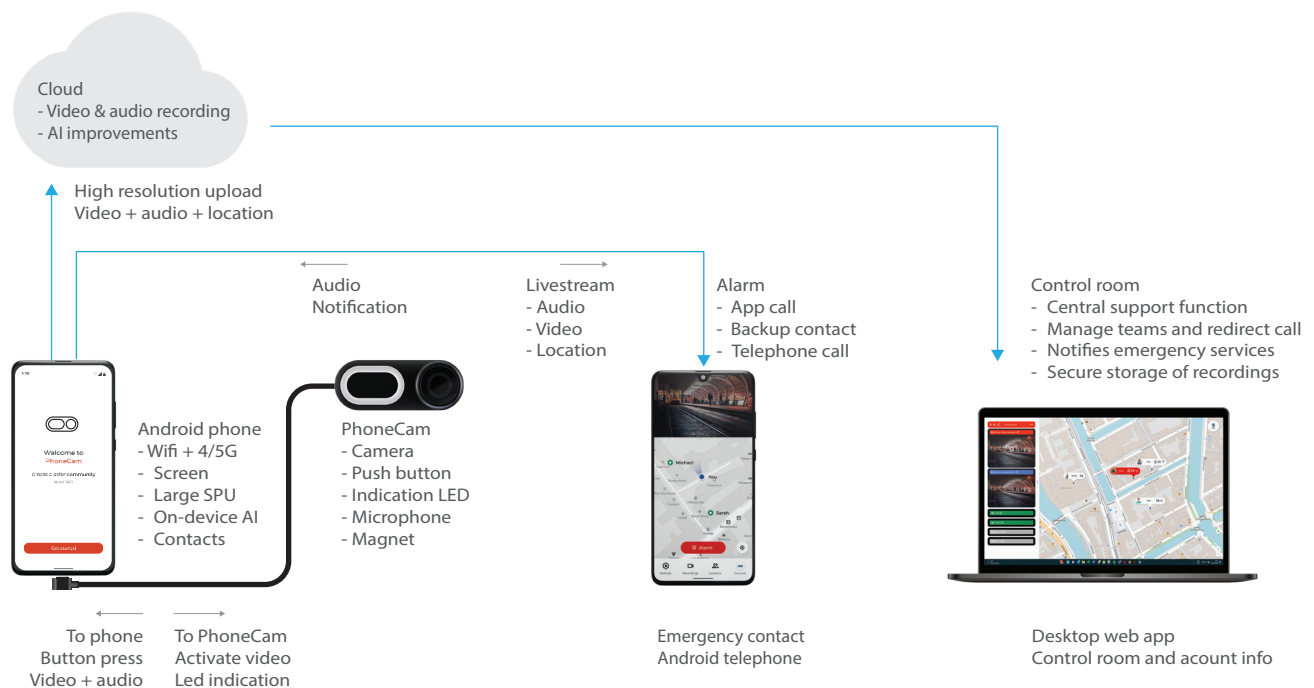

Install the app in just a few steps and link it seamlessly to the web platform for full control room functionality.

Easy to manage

Centrally manage teams, locations, recordings, and settings: securely and efficiently.

How does it work?

*All products, product specifications and data are subject to change without notice to improve reliability, function or otherwise.

Use cases

Security staff

"With PhoneCam, I feel more secure. I've used it to stream live video during incidents, and the controlroom could see exactly what I was dealing with and guide me through it. It's a game-changer for lone workers." - Mark, Security Guard

Retail staff

Research shows that aggression toward retail staff dropped by 35% to 70% when a bodycam is worn. Furthermore, 60% to 80% of employees report feeling safer and more confident while working with a bodycam.

Event staff

"We often face unexpected situations. When we used PhoneCam bodycams, our coordination has improved a lot. My team manager can see where we are, call us directly, and connect us with colleagues when needed. In emergencies, this fast communication really helps." - Linsey, Part-Time Event Staff

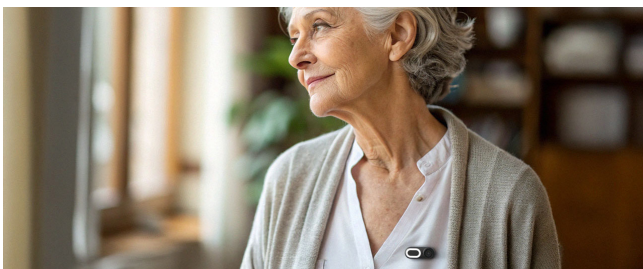

Public transport

Pilots with bodycams have shown a clear decrease in aggression toward staff and improved feelings of safety. The main obstacles are the willingness of staff to wear large, heavy bodycam and the running costs.

Training & technical support

As technology evolves and experienced workers retire, on-the-job training and remote support are becoming critical to our success.

"With the PhoneCam, I can work hands-free and stay in direct contact. If something's off, I start a live stream and my supervisor or contractor sees exactly what I see." - Ray, construction worker

Care

"We focus on giving people the tools to live independently despite their limitations. PhoneCam is a new powerful tool to do that. It allows users to describe their environment, read signs or labels, and connect with a trusted person if they need help. It is great to see them gain back their freedom." - Monica, careworker

Specifications

Compact

- Dimensions: 50 x 20 x 15 mm or 2.0 x 0.8 x 0.6 inches
- Light weight: Less than 1 ounce (.7 oz.) or 20 grams

One button-press notification

- Live streaming video and central recording
- Two-way audio for direct support
- GPS location

LED indication

- Iconic LED indicators that deters and de-escalates
- Recognisable colors for different functions
- Stealth mode option

Video & audio

- HD wide-angle camera (1080P, 30fps 140deg FOV)
- Low light enhancement
- High quality audio, optimal for speech recognition
- 48-96 hrs standby operation, 4-6 hrs continuous recording (depending on smartphone battery capabilities)

Connectivity

- 4G/5G and WiFi connectivity
- With GSM backup

Certifications

- CE, IP67 (dust and water resistance)
- Patented bodycam-smartphone system (nr2037059)

PhoneCam app & control room software

- Android mobile app available in Google Play Store
- Web application with control room functionality and different license agreements
- 3rd party integration possible via API

AI-enabled

- Live video can be used for e.g. objects and speech recognition
- On device and on premise s(V)LM modelling
- API for third parties

Privacy & security

- All recordings are transmitted with end-to-end encryption
- Securely stored in your private cloud or on-premises
- An authorization framework ensures that only approved users have access

Accessories

- Magnet Mount (included)
- USB-C cable (included)
- Jacket clip (optional)
